

External windows and façade refurbishment

Regent's University London - Oliver, Pilcher and Darwin buildings

Highlights

Axis completed an extensive exterior window and façade refurbishment programme on three buildings – Pilcher, Darwin and Oliver – at Regent's University London.

Scope of works included the exterior repair and decoration of Crittall windows, doors and decorative timberwork; as well as lead work and brick and roof repairs. Plants were removed to facilitate cleaning. Repainting and repointing throughout matched existing colours in the Crown Estate's approved stipulations. The campus was occupied throughout the refurbishment during the summer vacation; and works were successfully completed by the beginning of the autumn term.

Specifications
