

Community Centre Refurbishment

L&Q, Winsor Park, east London

Highlights

Axis worked in partnership with L&Q to deliver a two-month community centre refurbishment project at Winsor Park in Beckton, Newham, east London.

Winsor Park is a centre point for the local community and offers facilities for local groups including a nursery, main hall, office, kitchen, gents/ ladies WC, staff room and internal storage space.

To encourage more people to use the hall, our community centre refurbishment project here saw us redecorating all the communal areas and renewing all the flooring and the matwell to the communal doors

We additionally replaced the front entrance door and the intruder alarm. And we also decorated all the windows and door frames, internally and externally.

Specifications
