

Retrofit Roof Panels

L&Q, Reculver Road, Silwood Estate, south east London

Highlights

For our existing client L&Q, we undertook an eight-month roof replacement project at Reculver Road, Silwood Estate, London SE16.

To three blocks of flats here, we removed the existing roofs and installed new insulation and Iko roofing system. We also installed new solar panels and a safety system handrail.

L&Q residents can now look forward to

- better acoustic insulation
- better thermal insulation
- lower energy bills (as the solar panels will reduce the amount of energy used from the National Grid)
- reduced carbon footprint

Specifications

- Removal of green roofs
- Installation of new insulation
- Installation of new Iko roofing system with 25-year guarantee
- New safety system handrail fitted around roofs
- New solar panels

£1.2m value
8 months duration
